## UFIS-AS Provides its Resource Management System to Alitalia

Source: UFIS

06/09/2010

UFIS Airports Solutions' (UFIS-AS) newest customer is Alitalia Ground Handling at Rome's Fiumicino Airport. With the assistance of its local partner Softlab, UFIS-AS is delivering its UFIS® Resource Management System. The delivery has been in a four-phased approach. Operational use of Rostering and Coverage for apron services began in late April with daily deployment, using OPSS-PM, beginning in June. Alitalia is scheduled to begin using Rostering and Coverage for its passenger services at the beginning of October. This will be followed by operational use of OPSS-PM for passenger services at the end of October.
